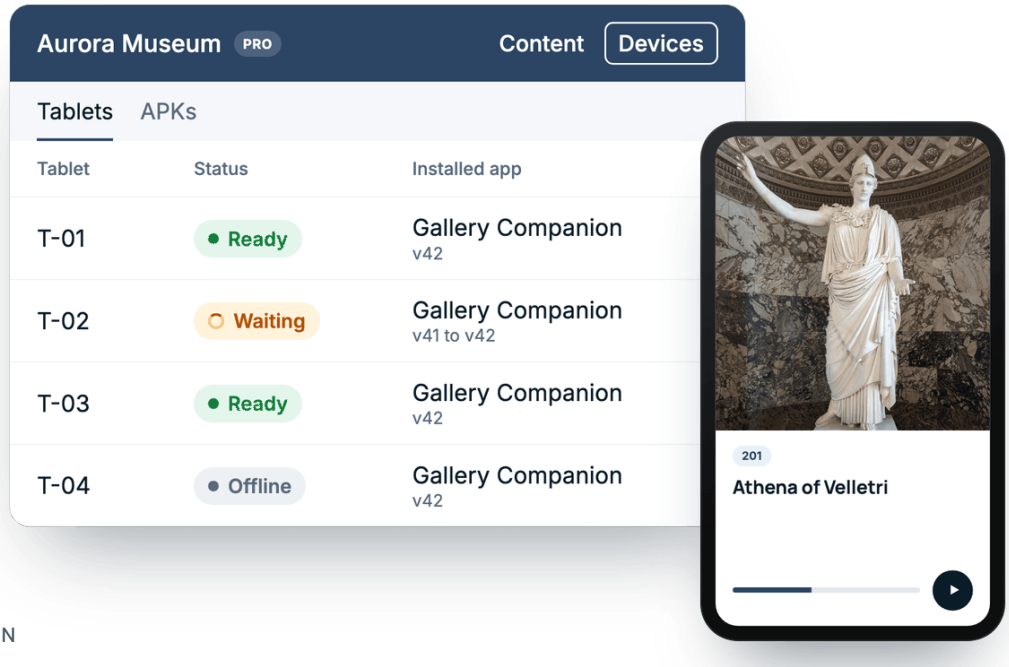
Mobile Device Management

Remote management built for Look
3 tablets



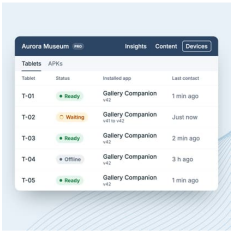
DESIGNED IN

Belgium

About this Product

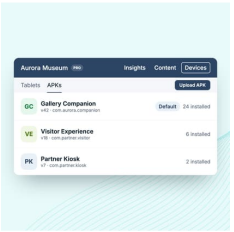
Look2MDM is the device management platform built for Look 3 tablets. It turns them into secure, remotely managed visitor devices for museums, attractions, exhibitions, and public venues. Deploy an application from a software partner or your own custom APK, keep every Look 3 up to date and lock the application in kiosk mode.

Key features



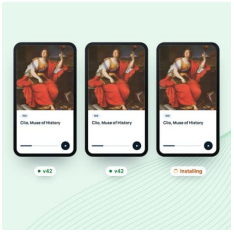
Online fleet management

See which Look 3 tablets are ready, waiting for a change, or offline. Check the assigned and installed APK, the app currently running, and the last successful contact without handling the device.



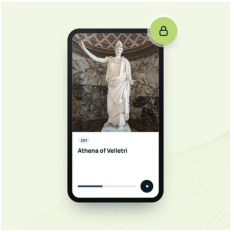
Built for partner and custom APKs

Upload any Android APK built for the Look 3 by your software partner or development team. Keep versions and package details organized, choose the default for newly enrolled tablets, and see how many devices



Silent, controlled application rollouts

Assign an APK to one tablet or a selected group. Look2MDM downloads and installs it in the background, verifies the package, version, and file hash, reports errors, and confirms the version actually



Kiosk mode

Keep visitors in the intended app with kiosk controls made for the Look 3. Look2MDM reconciles the desired state at every heartbeat, can relaunch the assigned app, and gives staff a controlled way to pause or

Technical Specifications
