AUDIO GUIDES

Mini Style Keypad

Compact audio guide with number keys

DESIGNED IN

Belgium

About this Product

The Mini Style audio-guide platform with a physical numeric keypad. Visitors enter a stop number to play commentary, use Point & Click targets, or follow automatic IR/RF triggers. It also receives live guide audio from a compatible STYLE TGT transmitter, so the same compact device can serve individual visitors and guided groups.

Key features

Choose a stop by number

Enter the number beside an exhibit and press play to hear its commentary. The circular controls keep pause, resume, volume and track navigation within reach.

Buzz & Play

Approach a target to trigger audio content with vibration feedback. A fun and intuitive way to interact with your exhibits.

Precise Location-Based Triggering

Automatically trigger content as visitors approach using RF or infrared with 10cm precision.

Point and Click

Trigger messages by pointing and clicking at a target.

Technical Specifications

SOFTWARE

- Up to 5-year warranty

More Features

Video Synchronization

Synchronize with external videos by IR, RF or Point & Click! Each visitor can listen to audio content in their own language, in sync with show controllers or videos for the ultimate interactive experience.

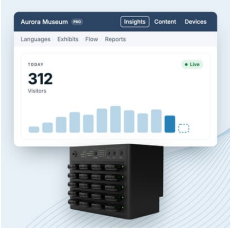

Timeless Design

Sleek and ergonomic design – light, modern, and user-friendly.

Tour Guide System

Use a compatible STYLE TGT transmitter for live commentary and remote playback of recordings. Visitors can also select recorded stops using the keypad.

Automatic Visitor Statistics

Each time the guides charge, the smart charger uploads their usage data to Look2Guide. See which stops visitors play and how long they listen, without exporting anything by hand.
