About this Product

Included free with every Look2Innovate project, AI Content Studio is the full authoring suite for creating, editing, translating, and publishing museum audio. Teams can generate narrated audio, translate tours into visitor languages, and keep editorial control before anything reaches an exhibit.

Key Features

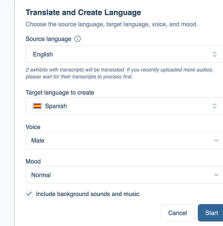

AI audio editor

Write or edit the script, choose a voice and mood, adjust silence between parts, add background sound, and preview the result before publishing.

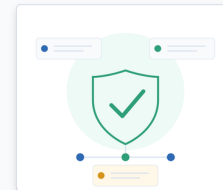

Publish to audio guides

Approved narration is attached directly to the exhibit language content used by visitor audio guides.

Translate complete tours

Create a new language from source transcripts and queue translated AI audio for every exhibit that is ready.

Private AI generation

Audio is generated on Look2Guide-controlled servers for GDPR-compliant workflows. Scripts, source audio, and generated narration are never sent to third parties for AI training and are never used to train AI

Technical Specifications

SOFTWARE

- | AI narration from typed, imported, or translated exhibit scripts
- | Editable audio-part timeline with per-part text control
- | Waveform preview and playback before publishing
- | Voice selection for each generated audio part
- | Mood and delivery style selection for narration
- | Silence timing controls between audio parts
- | Background sound and music support for richer exhibit audio
- | Create new visitor languages from source transcripts
- | Batch language creation across exhibits with ready transcripts
- | Unlimited AI generations and regenerations for iteration
- | GDPR-compliant AI audio generation on Look2Guide-controlled servers
- | Scripts, source audio, and generated narration are not sent to third parties
- | Customer content is never used to train AI models
- | Copyright-conscious handling for museum scripts, translations, voices, and background...
- | Human review before generated audio reaches visitors
- | Publish approved audio directly to exhibit language content

More Features

Review before publishing

Generated audio stays editable. Teams can revise text, regenerate only the parts that need work, and publish when the result is ready for visitors.
