About this Product

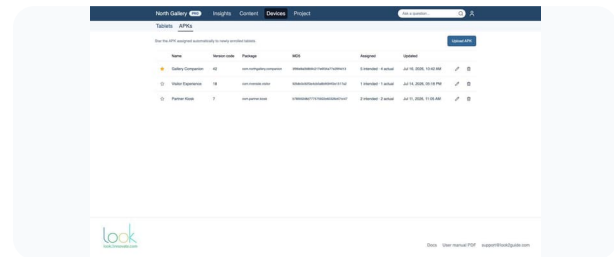

Look2MDM turns Android tablets into secure, remotely managed kiosks for museums, attractions, exhibitions, and public venues. Deploy an application from a software partner or your own custom APK, keep tablets up to date and lock the application in Kiosk mode.

Key Features

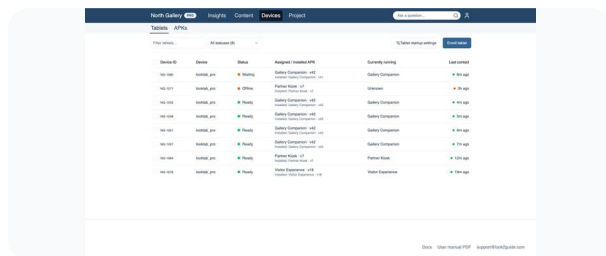

Online fleet management

See which tablets are ready, waiting for a change, or offline. Check the assigned and installed APK, the app currently running, and the last successful contact without handling the device.

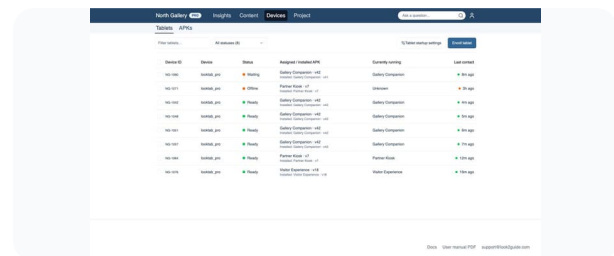

Built for partner and custom APKs

Upload any compatible Android APK from your software partner or development team. Keep versions and package details organized, choose the default for newly enrolled tablets, and see how many

Silent, controlled application rollouts

Assign an APK to one tablet or a selected group. Look2MDM downloads and installs it in the background, verifies the package, version, and file hash, reports errors, and confirms the version

Kiosk mode

Keep visitors in the intended app with Android device-owner kiosk controls. Look2MDM reconciles the desired state at every heartbeat, can relaunch the assigned app, and gives staff a controlled way to

Technical Specifications

SOFTWARE
